ML2021Spring HW5 Report

<Economics> <TSU-FU, Li>

<r09323036>

Public Score	Private Score
30.30	29.35

The methods I used to pass the strong baselines include:

Method A : I use transformer structure and set parameter as the paper(tansformer is all you need,table 3). I Apply back-translation(zh-en) ensemble method first, the BLEU score is 21.06. Next, I use backward model to predict on monolingual data. Finally, I mix monolingual data and original data to forward model(en-zh).
